2026/2027

FAIR TRANSPORT

SUSTAINABILITY CERTIFICATION FOR FREIGHT TRANSPORTS ON THE ROAD

GLC Flytt AB

LEVEL OF ADDED VALUE 3 - VALID FROM 2026-03-16 TO 2027-03-15

WE ARE COMMITTED to work in accordance with all criterias within Fair Transport. We are part of the haulage industry's work for a sustainable chain of transportation. This means that we drive safely, think climate-smart and offer good working conditions. We believe that both buyers and sellers of transport must take responsibility for a safe, clean, responsible and thus a sustainable haulage industry.

Oscar Hyléen, VD Sveriges Åkeriföretag

Jonas Hagelqvist, VD Transportföretagen

SVERIGES ÅKERIFÖRETAG

The Swedish Association of Road Transport Companies is the haulage industry organization and we work for a healthy and profitable development of the entire haulage industry. We represent 5,200 member companies with 38,000 vehicles throughout Sweden. We pursue transport- and social political subjects that affects our members in order to strengthen our common competitiveness and improve the conditions for conducting haulage operations.

TRANSPORTFÖRETAGEN

Transportföretagen is the industry and employer organization for the transport sector with just over 9,000 members, all of whom in various ways ensure that Sweden is kept in motion. The role of Transportföretagen is to lead development towards the best possible conditions for the transport industry through collaboration in employer issues and business policy.

The Swedish Association of Road Transport Companies and Transportföretagen work together for an increasingly sustainable transport industry. Fair Transport, which is a certification for sustainable transports on the road, is part of this. The certification is owned and operated jointly.
